Subject: Talks in the 1st class

Date: February 16, 2021 at 10:15 PM

To: Xinqi Zhu xinqi.zhu@sydney.edu.au, Xikun Zhang xzha0505@sydney.edu.au, Yanxi Li yali0722@uni.sydney.edu.au

Dear All,

Thanks for accepting the invitation to give a talk in our first deep learning class (**6 PM Friday 3 March**).

In the first class, I will first introduce this deep learning unit, and then you may take the following order to give the talks.

Xikun Zhang - "On Dropping Clusters to Regularize Graph Convolutional Neural Networks"

Xinqi Zhu - "Learning Disentangled Representations with Latent Variation Predictability"

Yanxi Li - "Adapting Neural Architectures Between Domains"

Each of you will have 20 minutes to deliver the talk and take the questions.

Please join the zoom meeting via the link <https://uni-sydney.zoom.us/j/88110730461> Looking forward to your talks. Thanks a lot for your support.

Ps. I would count the contributed talk into the tutor load and inform you later when you make the tutor claim.

Regards,
Chang
