---

Dear Xinqi Zhu,

Congratulations! Your paper 1227 "Learning Disentangled Representations with Latent Variation Predictability" has been accepted for publication at ECCV 2020. We received a record number of 5025 valid submissions, of which 1361 or 27% were accepted for publication.

Due to the unforeseen Coronavirus epidemic, we had to move to an online format. Nonetheless, we subdivided the accepted papers into three categories, corresponding to oral, spotlight, and poster presentation at a physical conference. 104 of the papers (2%) were accepted as orals and 161 (top 5% of submissions) as spotlights, the rest as posters. Your paper belongs to the category poster.

In order to cover the costs of the conference, while simultaneously promoting broad attendance, the general chairs and us decided to charge a fee of 450 GBP for each accepted paper (this includes one full registration to the conference). This paper fee allows us to keep the registration fee low (125 GBP for early registration), which will encourage many more people to attend live and view your paper presentation during the conference. For your paper to be published, you must pay the fee before the camera-ready deadline, which is on July 17 23:59 UTC-0. Instructions for the preparation of camera-ready papers and paper registration will follow in a separate email in the coming days.

You can access the reviews and the consolidation report in OpenReview. Please consider potential remarks by the Area Chair and the reviewers to improve your final paper.

To avoid undeclared conflicts, the author list is considered to be final after the submission deadline and no changes are allowed for accepted papers. There will be no exceptions.

We are looking forward to seeing your presentation at ECCV 2020!

Horst Bischof, Thomas Brox, Jan-Michael Frahm, Andrea Vedaldi
