Dear author,

Congratulations on the acceptance of your paper to CVPR'21!

This email contains important information regarding (1) the virtual presentation format for CVPR'21 and (2) preparing your camera-ready manuscript.

(1) CVPR'21 - Virtual program format

In the CMT system, your paper was accepted with the traditional designation as either an "oral" or "poster". The oral/poster (and sometimes "spotlight") distinction has long been part of CVPR and is attributed to the inability to have all papers presented in an on-stage/podium format at a physical conference. However, the same constraints do not apply to a virtual conference like CVPR'21.

Orals traditionally represent papers of broader interest and CVPR'21 ACs were instructed to still make the oral/poster distinction in their decision-making. Given the virtual conference format, ACs were encouraged to be generous; inevitably, there is a great deal of variation in the papers that were designated as "orals". In the end, 17% of accepted papers were marked as oral. In the main virtual conference, oral papers will be denoted (with a star beside the paper); however, all papers will be given the same presentation format.

Namely,

1. All papers will have an accompanying video (maximum 5 minutes) viewable by attendees at any time
2. All papers will have a poster PDF viewable by attendees at any time
3. All papers will have a live-session time via a conference provided video-link to discuss their paper with attendees
4. All papers will have an asynchronous Q/A panel where questions can be posted at any time by attendees and answered by the authors

Further details regarding the preparation of your video and poster and how to upload to the virtual platform will be given after the camera-ready deadline.

(2) Camera-ready instructions [Due: March 29, 2021]

Please find below a google document and PDF (for authors who have trouble accessing google docs) with instructions on submitting your camera-ready manuscript. Please take time to read the instructions carefully. There are many steps required to ensure your PDF is valid for inclusion in the IEEE-Xplore repository.

Google doc: <https://tinyurl.com/85x3a6va>

PDF doc: http://cvpr2021.thecvf.com/CVPR_2021_Camera-Ready_Submission_Instructions.pdf

Registration - Each paper will require at least one author to register for the conference and be committed to submitting the materials mentioned above (video, poster) and be available in the live session for their paper. If an author has multiple papers, they need to register only once. When you register, please have your paper IDs ready, as the registration system will ask you to provide the IDs associated with your registration.

Note that we are aware that our camera-ready date (March 29) is close to the supplemental materials deadline for ICCV'21. We regret that we cannot give more time for the camera-ready submission. The March 29 date is firm because we need to comply with internal IEEE deadlines for papers to appear in IEEE Xplore.

Best regards,

David, Georgia, Tinne, Ruigang, Jingyi
CVPR'21 Program Chairs

Michael, Rahul, Lihi, Tieniu
CVPR'21 General Chairs
